

Burger Box Artwork Guideline

Everything you need to build print-ready artwork for the BistroPack Burger Box dieline handling, color, type, and the final checks before your file goes to press.

 Size	 Base Material	 Print Option	 Color	 Sustainability
240 x 120 x 100mm	Brown Kraft / White	Outside Only	CMYK, 4 PMS Max	Recyclable

01. Dieline and Bleed

Your unique structural dieline is included in the print file. It defines exactly where the box is cut and folded, so treat it as read-only.

- 01. Do not move, edit, rotate, or recolor the dieline layer.
- 02. Extend backgrounds to fill the full bleed area 5mm minimum on all sides.
- 03. Keep text and logos 3mm inside the trim line as a safety margin.
- 04. Place your artwork only on the "Your Design Here" layer.

02. Folded Result
